1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

1999 Analytical Review DWCCA-1810-ELE

Dear Mrs. Hahn:

The Public Service Commission has completed their analytical review of your 1999 annual report. The primary purpose of our analytical review is to detect possible accounting related errors and to identify significant fluctuations from prior year's data, which are not sufficiently explained in the footnotes of your annual report. We have no questions, only the following comment.

During our review, we noted \$19,060 reported in Account 145, Receivables from Municipality with no explanation for this amount provided in the detail column. The program edit requires detail in this column. It appears a "space" was inadvertently recorded in this field and the program reads this as the required detail. In the future, please be sure explanations are provided in all detail columns as required. In addition, total sewer maintenance expenses and total sewer customer accounting and collecting expenses increased greater than 25% and \$2,000 without explanation on the Sewer Operation & Maintenance Expenses schedule note. In the future, please be sure to provide an explanation when water or sewer expenses fluctuate by 25% and \$2,000.

Thank you for your efforts in preparing your 1999 annual report. We are closing the review of your 1999 annual report. If you have any questions, please feel free to contact me at (608) 266-3768.

Sincerely,

Elaine Engelke
